Introducing AutoSight

AutoSight is a brand new app, developed exclusively by Extra Technology, CA Technologies' Preferred Workload Automation Partner with over a decade of experience designing, implementing and running Enterprise Workload Automation solutions.

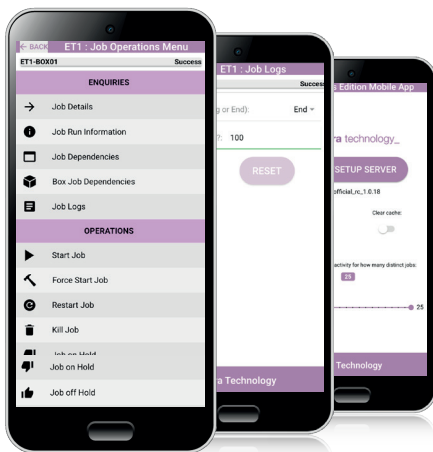

AutoSight is designed for administrators and users of CA Workload Automation AE (CA WA AE).

Using **AutoSight**, you can view and manage your CA WA AE jobs and workflows on your mobile device wherever you are, responding to problems and alerts while out of the office and without a laptop.

Highlights

By combining CA's Web Services interface for CA WA AE with Extra Technology's deep expertise in Workload Automation, **AutoSight** delivers powerful functionality to your iOS or Android device:

CA WA AE Jobs

- See Job attributes, Job statuses, Job runs with detail reports, Job dependencies
- Interact – put jobs **on hold**, **force start** jobs, **release resources** and many more actions

CA WA AE Global Variables

- View, add, change or delete Global Variables

CA WA AE Machines

- View machine attributes and Machine statuses

Other Functionality

- Powerful search capabilities, using wildcards
- App History trail – records what you did
- Selecting and favouriting of critical jobs – make them easy to find
- Tutorial Tips

Security

Double-secured – by CA Embedded Entitlements Manager at the server side, and by additional passwords and automatic timeouts in the app itself.

Benefits

For CA WA AE Administrators supporting large workflows, and CA WA AE users responsible for managing critical workflows, **AutoSight** provides:

- Secure and powerful interaction with your CA WA AE environments on mobile devices
- Remote monitoring and management of workflows irrespective of location

Requirements

- CA WA AE r11.3.5 or newer
- CA Embedded Entitlements Manager
- CA Workload Automation Web Services

Want to try AutoSight?

AutoSight is commercially released on iOS and Android.

About extra technology

Extra Technology recently celebrated our tenth anniversary of providing expert automation solutions to enterprise customers. We have deep Subject Matter Expert (SME) consultancy and training skills in individual automation technologies – process automation, release automation, workload automation and robotic process automation.

We also specialise in integrating diverse multi-vendor automation environments into a single Intelligent Automation platform, boosting compliance and efficiency and radically reducing costs.

Compared to other integrators, the Extra Technology difference is extensive, real-world experience.
